ONE CUSTOMER AT A TIME

Dolphin Scaffolding offers over 30 years of combined experience and expertise in the scaffold erection business.

We deliver best-in-class solutions, with a focus on safety, quality, and timeliness. Our team is devoted to exceeding customer expectations and creating an incident-free environment.

Dolphin Scaffolding is skilled, experienced, and committed to the Dolphin mission, *“to consistently service the needs of the oil and gas industry, one customer at a time, with innovative, high-quality goods and service.”*

SUPERIOR EQUIPMENT

Dolphin Scaffolding uses pin lock scaffolding systems.

All equipment is transported to and from job sites in certified engineered cargo carrying units that surpass all Gulf of Mexico lifting requirements.

Scaffold Equipment Line

Free standing scaffold

- Scaffold opens at the bottom, in case of an emergency, to allow access to primary and secondary mustered stations

Wind break scaffold

Hanging scaffold

- Extends over the side of the platform
- Scaffold can be erected to make field welds or provide access to flow lines
- Complete ladder access

Step up / down scaffold

Solid board deck scaffolding

Scaffolds are erected for bottom deck work such as

- Inspection
- Pipe supports
- Changing out pipes
- Fireproofing

DEDICATED CREW

With Dolphin Scaffolding, safety and proper training are paramount.

We require our team members to complete a rigorous, in-depth safety training course taught on-site by an accredited trainer, who is certified by the Scaffolding Training Institute. Our training includes a complete training simulation structure, where our crews receive comprehensive, practical, hands-on training and testing in erecting and dismantling scaffolding.

- Field foreman provided on all jobs
- 2-4 scaffolding technicians – provisions depends on scope of project
- Certified to construct scaffolding systems to OSHA regulations
- All personnel will be wearing FRC clothing

TOP OF THE LINE TRAINING

- Builders are required to attend a 10-hour scaffold training course
- Scaffold training consists of:
 - Videos and workbook
 - Knowledge test
 - Hands-on scaffold erection and dismantling
- Safety manual
- Medical FA/CPR/BBP
- Confined space
- Hazard communication
- Lockout / tag out
- Personal protective equipment
- Water survival w/ HUET (Triton)
- Safe gulf/ safe land
- End-user fall protection
- Competent person rescue
- Fire watch w/ field exercise
- Rigger qualification
- Hydrogen sulfide (H₂S)
- All employees receive additional training in:
 - Asbestos awareness
 - Back safety
 - Hand safety
 - Drug and alcohol awareness
 - Marine trash and debris awareness
 - SEMS awareness
 - Safety first scaffolding / the cost of accidents
